

Ms DeSantis' ECO CHALLENGE

IF YOU COMPLETE ANY OF THESE TASKS, LET US KNOW ON TWITTER AT @OverfieldsPri

Hi boys and girls, hope you are all well and staying safe. While we are not at school, I have thought of a few challenges that you could do with an Eco theme.

If you save the tops of your vegetables, you could grow some new plants just by putting them in water. Look at the picture, there are carrots, turnips, lettuces, onions, beetroot and celery.

Remember our work on recycling and stopping plastic waste getting into the oceans? How about collecting plastic from home and making your own model? It could be anything, an animal, a vehicle, a building. Let your imagination run wild.

Earth Day this year is held on 22nd April. Could you design a poster or draw a picture saying why the earth is such a great place to live?
