

Key Stage 2 Language Unit Weekly Home Learning 11.05.20-15.05.20

Here are the activities for this week. Please send some of your work and photos of what you have been doing to: ks2slu@overfieldsprimary.org.uk

Phonics—Play games on phonicsplay.co.uk Select Phase 3, choose Pick a Picture – blend words and match them to the correct picture. Also try Picnic on Pluto – sort words into real or fake. Have fun!

Spelling—This week I would like you to practise spelling the days of the week. Remember they always need a capital letter. Write a simple sentence for each day of the week, telling me something you did last week on that day.

P.E—Hope you are having fun exercising together. This week why not try KIDZ BOP Dance Along Videos on YouTube.

Art/Craft—Make either an animal mask, model, painting or drawing of the endangered animal you have chosen for this weeks writing task. You can use things from you recycle bin, items collected from the garden, plasticine, paint or pencils—what ever you have at home.

Reading—Reading challenge—I would like you to research an endangered animal just like we did in class for the Giant Panda. You can choose more than one. The information you find will be used in this weeks writing task.

[YouTube—Sci Show Endangered Animals](#)

[YouTube Learning Junction Endangered and Extinct](#)

[Endangered Animal Facts for Kids DK Find Out](#)

[Animal Fact for Kids Endangered Animals](#)

[Endangered Species Kids Discover](#)

These are just some of the great sites to explore.

Writing— From your research about endangered animals I would like you to make a poster about the endangered animal you have chosen. Try to include as many facts as you can, you can also include drawings. There is also a school writing competition where someone from each class can win a prize, visit the school website for details.

Maths—Keep learning your multiplication tables. This week I would like you to practise telling the time. You need to first know

ta- tell-

o'clock, half past, quarter past and quarter to. When you have got this you then need to be able to tell the time to five-minute intervals. There are some great online activities to help you do this – <https://www.education.com/games/time> <https://www.topmarks.co.uk> – telling time
